REDEFINING WHAT'S POSSIBLE

ALLIFT®
FULLY-OPTIMIZED PUMP WITH VERY LOW OPERATING AND MAINTENANCE COSTS.

Proven over decades of use: ALLift® guarantees a quiet and uniform delivery and high performance. No maintenance will be required over a long time due to no gasket and other wearing parts. ALLift® provides the highest performance at the best price.

ALLift® Special Features

- Nineteen different flow capacities from 8 to 260 GPM
- Aluminium alloy rotor housing with steel discharge connection for extra strength, reliability and superior performance
- Common shaft and mounting dimensions for the most popular sizes, providing flexibility and interchangeabilities with motors
- Pumps can be utilized with any various submersible motor
- Light weight for ease of handling

Design and Operation

The Allweiler® three-rotor screw pump is a positive displacement rotary pump with an axial flow design.

There are only three moving parts. The main screw is the only driven part which extends outside the case. The idler screws act as sealing parts and are turned hydraulically by the fluid being pumped. Thus, the mechanical action between the screws is negligible. There is only a rolling action between the drive screw and the idler screws. The outside diameter of the idler screw is the same as the root diameter of the drive screw. The rolling action eliminates noise and vibration.

The double lead screw design provides a continuous non-pulsating flow. An unobstructed axial flow through the pump results in low velocity and excellent suction capabilities. Discharge pressure is spread evenly over the length of the screw from suction to discharge.

The Allweiler® three-rotor screw pump is balanced both axially and radially. The double lead drive screw results in symmetrical pressure loading which centers the drive screw in the bore eliminating radial loads. The axial load created by the discharge pressure is balanced by means of microfinished stop faces at the discharge of the pump.

ALLIFT®
ALLWEILER® SUBMERSIBLE ELEVATOR SCREW PUMPS
3400 RPM, 150 SSU

ALLift®: High performance screw pumps operating at a very low noise level for hydraulic lifts, lifting platforms, stages and other hydraulic machines.
 For mineral oil-based hydraulic oils or synthetic hydraulic fluids and similar liquids.
