

EMERGENCY WATER AND PARTICULATE REMOVAL

When you experience a sudden ingress of water or other contaminants into your lube system, your equipment life and production uptime are at significant risk. Standard filtration elements are not designed to maintain system cleanliness specifications under such conditions, especially when the contaminant is water.

Even worse, high contaminant levels can severely compromise a lubricant's ability to protect your valuable assets.

To prevent this from occurring, count on Colfax Fluid Handling's Reliability Services to immediately remove the contaminants that have entered your operating system. By doing so, you'll minimize component damage quickly, without affecting production.

ON-SITE INSPECTION

Knowledgeable staff work with plant personnel to:

- Coordinate the appropriate response to your immediate need for lubrication related assistance
- Work to determine the root cause for the contamination event and assist in implementing a solution that might include regular Oil System Preventive Maintenance

Our technicians arrive on-site to:

- Complete purification of the operating equipment and verify that lubricant cleanliness specifications are met or exceeded
- Offer Reclamation Equipment Rental options for maintaining the restored cleanliness level

Colfax Fluid Handling Reliability Services

1740 Stebbins Drive

Houston, TX 77043

Tel: +1.713.464.6266

Reliability Services

CLARUS® COT-PURITECHSM LSC® LUBRITECH® SICELUB®

PROCESS DETAILS

- Alert Generated
 - Oil Analysis Report
 - Visual Inspection
- Equipment Set-up
 - Set-up of Reclamation Equipment
- Purify Fluid and Verify Cleanliness Level
 - Filtration
 - Centrifugal Separation
 - Vacuum Dehydration
 - On-site Analysis
- Final Inspection of Components and Reservoir
- Complete Service Summary

BOTTOM LINE BENEFITS

- Revenue improvement due to timely prevention of unscheduled downtime
- Reduction in lubricant and wear-related component expenses
- Minimization of lubricant waste

ENVIRONMENTAL HEALTH & SAFETY

Reliability Services routinely reviews EPA and safety regulations, including the latest updates as they apply to your specific operations. In addition, Reliability Services carries extensive liability insurance.
