GAS COMPRESSION SYSTEMS

REFRIGERATION
At CIRCOR's SES International, we focus on delivering total solutions, based on your requirements. We design a full line of process packages from SES-standard basic compressor packages to turnkey chillers, customized to specific client needs. Because every single unit is developed according to the unique demands of individual client applications, we're able to give you the best COPs possible. With rising global energy costs and the need for more sustainable energy consumption as motivation, SES International has designed a high efficiency oil separation system. This ensures the lowest possible oil carryover downstream of the compressor package. With this sophisticated design, we are trying to eliminate negative environmental impacts by reducing energy consumption.
HIGH EFFIENCY REFRIGERATION PACKAGES

KEY FEATURES

› Howden Compressors ltd. approved OEM packager for over 55 years
› Packages cover a range from 300 up to 24,000m³/hr
› Easy maintenance due to sophisticated design
› Large stock with genuine Howden spare parts covering all models

› High efficient 4-stage oil separation system
› Vertical and horizontal oil separator possible
› Oversized, rigid and vibration free base frame
› Machined base frame for easy alignment of compressor and motor
› Separate stainless steel lines to manifold mounted pressure transmitters
› Extensive plc control systems to client specifications or standard electro mechanical basic safeguarding

EXPERTS YOU CAN COUNT ON

With over 50 years of experience, SES International bv is a global leader in the manufacturing of compressor packages and chillers for the oil and gas, petrochemical and refrigeration industries. We supply high quality, tailor-made compressor packages backed up by our own service department for total maintenance and spare parts.
CIRCOR is a market-leading, global provider of integrated flow control solutions, specializing in the manufacture of highly engineered valves, instrumentation, pumps, pipeline products and services, and associated products, for critical and severe service applications in the oil and gas, power generation, industrial, process, maritime, aerospace, and defense industries.
