GTS 2100 Series
Medium Pressure Two Screw Pumps

Formerly a product of our sister division IMO Pump, the GTS product line has now moved to Colfax Pump Group’s North American Two Screw Center of Excellence.

- Capacities to 6000 GPM
- Discharge pressures to 600 PSI
- Viscosities to 4,500,000 SSU

Advantages

- **Variable Capacity** - Design permits a wide pumping range per case size
- **Engineered Construction** - Insures accurate assembly
- **Self-Priming / Low NPSH Requirements** - Inlet design insures maximum suction event after running dry
- **Controlled Fluid Temperature** - Pumping cavity has integral chamber for steam or hot oil heating of viscous fluids on start-up
- **No Cooling Required** - High efficiency timing gears and oversized lube oil reservoir eliminates costly external cooling system

Applications

- Crude oil
- Asphalts and tars
- Aromatic, naphthenic and aliphatic intermediates
- Fats, oils, waxes and soaps
- Molasses, glycerol, glues
- Paints, resins and polymers

Options

- Integral relief valve (applicable for normal flow direction only)
- Hard faced screws
- Nitrided screws
- Chrome-plated body bores

Typical GTS 208 Crude Oil Pumping Station Application
Integral Relief Valve
Protects the pump against over pressure. Saves cost of separate valve, fittings, and installation labor.

Fabricated Casing
Allows for a variety of options regarding port size and location.

External Bearings and Timing Gears
Allows pumping of virtually any fluid.

Heavy Duty Roller Bearings
Approximate Dimensions - Housing available with fabricated casing except where noted.
